Enthusiastic B.Tech graduate in Robotics and Artificial Intelligence seeking to leverage hands-on experience in application development, Python programming, and full-stack web technologies as a Software Developer Trainee. Proven ability to build, test, and maintain real-time applications within collaborative team environments. Proficient in JavaScript, React.js, MySQL, and MongoDB, with strong logical thinking and problem-solving skills eager to contribute to live development projects.

PROJECTS

Autonomous Mobile Robot for Campus Delivery

- Led a collaborative team to develop a real-time autonomous mobile robot (AMR) application for live campus deliveries.
- Handled code maintenance, software architecture design, and LiDAR-based sensor integrations.
- Conducted extensive field testing and debugging, improving system reliability in dynamic environments.
- Solved navigation challenges through iterative logic and motion playback updates.

Robotic Arm Controller Application with GUI

- Developed a desktop application utilizing Python (Tkinter) for live control, tracking, and monitoring of a 5-DOF system.
- Implemented reliable serial communication logic and robust code backends for hardware integration.
- Responsible for testing, troubleshooting, and system-level debugging to optimize overall performance.

EXPERIENCE

Machine Learning & AI Intern 2025
Keltron Knowledge Centre *Kozhikkode, Kerala*

- Assisted in coding, testing, and optimizing data pipelines and application workflows using Python.
- Worked closely with experienced mentors in a team-oriented environment to build and deploy analytical models.
- Strengthened practical debugging skills and logical thinking through structured code maintenance and system testing.
- Gained valuable real-time exposure to translating real-world datasets into functional software solutions.

SKILLS

Technical Skills

- Programming: Python, JavaScript, HTML, CSS
- Databases: MySQL, MongoDB (NoSQL)
- Web Technologies: React.js, REST APIs, Postman
- Tools & Version Control: Git, GitHub
- Core Concepts: Data Structures, Object-Oriented Programming (OOP)

Soft Skills

- Logical Thinking, Problem-solving, Debugging, Team Collaboration, Adaptability

EDUCATION

Rajiv Gandhi Institute of Technology, Kottayam 2022 – 2026
B.Tech in Robotics and Artificial Intelligence
Relevant Coursework: Data Structures, Machine Learning, Computer Vision, Robotics

GHSS Chelari 2020-2021
Higher Secondary (Science)

CERTIFICATIONS

- Python for Deep Learning: Build Neural Networks in Python View Certificate
- Getting Started with Artificial Intelligence - IBM SkillsBuild View Certificate
